Automatic circle beating machine Servo circle beating machine

summary

1. Servo motor feeding, fast speed, high accuracy, and the circle forming accuracy is within plus or minus 0.2mm. And the workpiece is stable for a long time. There are about 50 circles with a diameter of 200 mm per minute.
2. Hydraulic cutting, strong force and neat incision. Precision machining, special treatment of mechanical shaft, high precision, high toughness.
3. PLC programming, human-machine interface display, simple circle input, easy operation, easy to learn, very humanized.

Performance characteristics

1. Servo feeding - fast and accurate, speed adjustable. Oil pressure cut-off - large force, easy and powerful line cutting.

2. PLC programming + man-machine interface display, easy to operate and learn. High end servo + planetary reducer.

3. Precision CNC turning and milling. Gear, shaft, wire feeding wheel and other finishing, special hardening, surface grinding and polishing, high hardness, smooth and wear-resistant.
