

Spot welding machine row welding machine for shelves

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Jin Hongxiang
- Certification: CE
- Model Number: JD-100
- Minimum Order Quantity: 1 set
- Price: Negotiable
- Packaging Details: Export safety wooden case
- Delivery Time: 5-10 working days. Or negotiation
- Supply Ability: 50 Set/Sets per Month

Product Specification

- Product Name: Spot Welder
- Applicable Industries: Building Cover Plate, Railway / Road Guardrail, Pet Cage, Storage Rack, Net Basket
- Rated Capacity: 100KVA
- Usage: Welding, Multi-point Welding
- Voltage: 380V, 50HZ
- Key Selling Points: Taiwan's Water-cooled Wet Control Transformer Will Not Be Affected By Overload
- Weight (KG): 450 KG
- Control System: Touch Electric Box Control
- Cylinder Stroke: 50MM
- Nominal Frequency: 50/60HZ
- Feature: Sufficient Power, Beautiful Welding, Firm And Fast Response
- Port: Shenzhen, China

Product Description

Spot welding machine row welding machine for shelves

For row welding and welding shelves, it can be used in storage shelves, supermarket shelves, exhibition shelves, etc., and can be multi spot welded at one time. Our configuration is of high standard, our advantages are more obvious, the row welding speed is faster, the reaction speed is more than 30% higher than that of the same industry, and the welding effect is more beautiful and firm.

Classification of spot welding machines

1. Spot welding machines can be divided into universal (universal) and special spot welding machines according to their purposes;
2. According to the number of welding points welded at the same time, it can be divided into: single point type, double point type and multi-point type;
3. According to the conductive mode, it can be divided into: unilateral and bilateral;
4. According to the transmission mode of the pressurizing mechanism, it can be divided into: pedal type, motor cam type, pneumatic type, hydraulic type and compound type (gas-liquid pressure type);
5. According to the characteristics of operation, it can be divided into non automation and automation;
6. According to the installation method, it can be divided into fixed, mobile or portable (suspension) spot welding machines;
7. According to the moving direction of the movable electrode (usually the upper electrode) of the welding machine, it can be divided into vertical travel (the electrode moves in a straight line) and arc travel;
8. According to the power supply mode, there are power frequency welding machines (50 Hz AC power supply), pulse welding machines (DC pulse welding machines, energy storage welding machines, etc.), and variable frequency welding machines (such as low-frequency welding machines).

Tooling or fixture of the machine

The spot welding machine is a row welding machine. Because of the different products, it is necessary to do some positioning tooling or fixtures for the workpiece to facilitate more suitable welding of the workpiece. These can be customized as required. The main machine remains unchanged.

Row welding die

Spot welding die

Product Description

Performance characteristics

1. Cylinder direct pressure mechanism, good follow-up performance, fast welding speed, combined cylinder, Taiwan AS2410 large flow solenoid valve. Taiwan AS2410 solenoid valve has strong suction and sensitive response. It is ideal for continuous row welding of mesh.

**Taiwan AS2410 large
flow solenoid valve**

**Connected large
air cylinder**

2. All red copper water cooling temperature control device of transformer has the advantages of long service life, low noise, safety and convenient use.

A. Taiwan transformer features: sufficient capacity, greater welding force and stronger conductivity.

B. Water circulation cooling, which can be used within the rated range to ensure 24 hours of operation.

C. Moreover, the temperature control device can work overload and automatically cut off power to protect the whole machine from being affected.

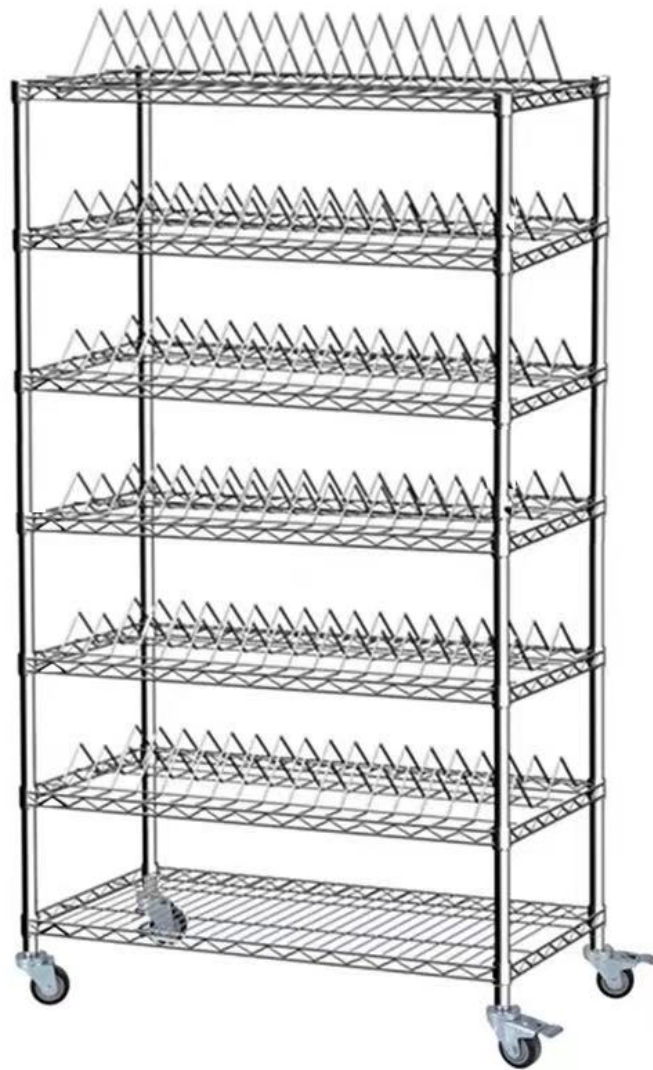

3. The water-saving forced cooling mode is adopted, and the main circuit adopts high-power SCR contactless switch, with high conductivity and low power loss, High temperature automatic protection.

Technical parameters:

Technical parameters:								
Model	Rated power KVA	Input voltage V	Nominal frequency HZ	Maximum short circuit current A	Arm length mm	Electrode travel MM	Cooling water volume	Weight KG
JD-60	60	380	50/60	22000	600	50	10	350
JD-80	80	380	50/60	28000	600	50	10	400
JD-100	100	380	50/60	30000	600	50	10	430
JD-120	120	380	50/60	32000	600	50	12	460
JD-150	150	380	50/60	34000	600	50	12	500
JDX-35	35	380	50/60	15000	400	50	/	197
JDX-50	50	380	50/60	20000	400	50	/	248

Necessary equipment for shelf production. Mainly based on row welding. According to the size of welding wire, the number of welding points can be 60KVA, 80KVA, 100KVA, 150KVA, etc.
Storage shelves, supermarket shelves, exhibition shelves, etc

We always attach great importance to product quality. Before leaving the factory, it will be fully aged and debugged. And we always adhere to the principle of "providing customers with better quality, better price and better service."
