

Solenoid Valve Multi Spot Welding Machine 400mm Arm 150KVA Three Head Spot Welder

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Jin Hongxiang
- Certification: CE
- Model Number: JD-150
- Minimum Order Quantity: 1 set
- Price: Negotiable
- Packaging Details: Export safety wooden case
- Delivery Time: 5-10 working days. Or negotiation
- Supply Ability: 50 Set/Sets per Month

Product Specification

- Product Name: Spot Welder
- Applicable Industries: Building Cover Plate, Railway / Road Guardrail, Pet Cage, Storage Rack, Net Basket
- Rated Capacity: 150KVA
- Usage: Welding, Multi-point Welding
- Voltage: 380V, 50HZ
- Key Selling Points: Taiwan's Water-cooled Wet Control Transformer Will Not Be Affected By Overload
- Weight (KG): 450 KG
- Control System: Touch Electric Box Control
- Cylinder Stroke: 50MM
- Nominal Frequency: 50/60HZ
- Feature: Sufficient Power, Beautiful Welding, Firm And Fast Response
- Port: Shenzhen, China

Product Description

Spot welding machine spot welder Three head spot welder

Be able to design a three head spot welder according to the shape and assembly of the product and the needs of welding. Three head spot welder is a spot welder for welding three cylinders. The pedal works once, and the three cylinders can be welded three times at the same time, or welded three times at a time. In order to achieve better welding effect and faster welding efficiency.

Other names

Spot welder, air pressure spot welder, row welder, touch welder, butt welder, pneumatic spot welder, multi spot welder, medium frequency spot welder, welder, pneumatic welder, high-power spot welder, precision spot welder, iron sheet spot welder, iron wire spot welder, resistance spot welder, nut spot welder, AC spot welder, 3-phase spot welder, spot welding machine, stainless steel spot welder, galvanized plate spot welder, customized spot welder, special spot welder, Battery spot welder, Taiwan spot welder, mesh spot welder, multi cylinder spot welder, gantry spot welder, wire mesh spot welder, DC spot welder, small spot welder,

Spot welding machine, air pressure spot welding machine, row welding machine, touch welding machine, butt welding machine, pneumatic spot welding machine, multi spot welding machine, medium frequency spot welding machine, welding machine, pneumatic welding machine, high-power spot welding machine, precision spot welding machine, sheet metal spot welding machine, wire spot welding machine, resistance spot welding machine, nut spot welding machine, AC spot welding machine, three-phase spot welding machine, stainless steel spot welding machine, galvanized sheet spot welding machine, Customized spot welding machine, special spot welding machine, battery spot welding machine, Taiwan spot welding machine, mesh spot welding machine, multi cylinder spot welding machine, gantry spot welding machine, wire mesh spot welding machine, DC spot welding machine, small spot welding machine,

Spot welder application

Resistance welding has the characteristics of high production efficiency, low cost, material saving and easy automation, so it is widely used in all walks of life. Now I will list the applications of spot welding machines in various industries and the types of spot welding machines that are suitable for them.

1. Electronics industry: medium frequency inverter spot welding machines and precision spot welding machines are also widely used in the electronics industry;
2. Automobile manufacturing industry: suitable models include mobile spot welding machine and hand-held spot welding machine;
3. Commodity hardware: such as coffee pot, basin, kitchen sink and other industries. Suitable for girth welding machine, straight seam welding machine and roll welding machine;
4. Jewelry industry: manufacturers of earrings, jewelry, headwear, etc., suitable for precision spot welding machines, medium

frequency spot welding machines, desktop spot welding machines.

5. Home appliance industry: such as air conditioner and water heater. Multi spot welder, backplate multi spot welder and hand-held welder are recommended;

6. Screen industry: recommended gantry wire mesh welding machine, full brake gantry reciprocating welding machine, semi-automatic gantry welding machine, medium frequency inverter welding machine, etc;

7. Fence industry: multi spot welding, row welding machine, circular butt welding machine and touch welding machine are recommended.

Different spot welding machines have different performances. When selecting a spot welding machine suitable for your own industry, you should pay attention to safety and operate in a ventilated environment.

Tooling or fixture of the machine

The spot welding machine is a row welding machine. Because of the different products, it is necessary to do some positioning tooling or fixtures for the workpiece to facilitate more suitable welding of the workpiece. These can be customized as required. The main machine remains unchanged.

Product Description

Performance characteristics

1. Cylinder direct pressure mechanism, good follow-up performance, fast welding speed, combined cylinder, Taiwan AS2410 large flow solenoid valve. Taiwan AS2410 solenoid valve has strong suction and sensitive response. It is ideal for continuous row welding of mesh.

**Taiwan AS2410 large
flow solenoid valve**

**Connected large
air cylinder**

2. All red copper water cooling temperature control device of transformer has the advantages of long service life, low noise, safety and convenient use.

- A. Taiwan transformer features: sufficient capacity, greater welding force and stronger conductivity.
- B. Water circulation cooling, which can be used within the rated range to ensure 24 hours of operation.
- C. Moreover, the temperature control device can work overload and automatically cut off power to protect the whole machine from being affected.

3. The water-saving forced cooling mode is adopted, and the main circuit adopts high-power SCR contactless switch, with high conductivity and low power loss , High temperature automatic protection.

Principle of spot welding

Technical parameters:

Technical parameters:								
Model	Rated power KVA	Input voltage V	Nominal frequency HZ	Maximum short circuit current A	arm length mm	electrode travel MM	Cooling water volume	Weight KG
JD-60	60	380	50/60	22000	600	50	10	350
JD-80	80	380	50/60	28000	600	50	10	400
JD-100	100	380	50/60	30000	600	50	10	430
JD-120	120	380	50/60	32000	600	50	12	460
