

## Flexible Loading And Unloading Robot Fully Automatic Software Operation

### Our Product Introduction

#### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Jin Hongxiang
- Certification: CE
- Model Number: 1510
- Minimum Order Quantity: 1 set
- Price: Negotiable
- Packaging Details: Export safety wooden case
- Delivery Time: 5-10 days or negotiation
- Supply Ability: 50 Set/Sets per Month

#### Product Specification

- Applicable Industries: Building Pipes, Process Products, Automobile Sheet Metal,
- Core Components: PLC, Precision Servo, Robot Body, Welding Power Supply, Control Cabinet
- Product Name: Industrial 6 Axis Arm Welding Robot
- Key Selling Points: Flexible, Stable, Durable And High Precision
- Weight (KG): 170
- Operation Type: Software
- Feature: Fully Automatic Arbitrary Action Programming
- Function: Automatic Welding
- Highlight: **Automatic Loading And Unloading Robot, Flexible Loading And Unloading Robot**

## Product Description

### Loading and unloading robot

#### Loading and unloading application of machine tool

##### Technical features:

High efficiency, fast tempo, reduce labor intensity. Meet the requirements of mass production;

The quality is stable, and the repeated positioning accuracy can reach  $\pm 0.08\text{mm}$ ;

Strong flexibility, the action and trajectory can be adjusted as required; Replace the gripper and material tray Switch products.

Strong versatility, suitable for loading and unloading applications of various lathes, milling machines, punches, etc.

Modular wiring unit, convenient and simple wiring, only one communication line is needed to connect each machine tool;

The fixed universal interface is easy to define, use and maintain;

##### Application field:

Such as milling, stamping, forging, die-casting, pouring, injection molding, assembly, handling, marking and polishing with CNC machine tools

##### "Our purpose:

Every device, we must do better!!

##### reminder:

Our products are constantly upgraded and improved.

If the color or structure changes, the actual object shall prevail"
